

Realignment of commercial processes for the Latin American region for Syngenta

Established and managed the Program Management Office (PMO) for a provider of Computer Aided Dispatch and Records Management System solutions for public safety organizations in the US and Mexico. Supervised 6 client relationship managers and 5 developers in the US and Mexico.

Project Outcomes

Led R&D projects to combine new mobile location-based technologies with mapping and logistics systems to improve asset allocation and distribution and optimize routing of emergency services.

Enhanced project management performance and productivity by standardizing procedures, implementing a project management system, and conducting bilingual project management training for staff in the US and Mexico.
